SUBJECT INDEX
VOL. 20 / 1984

Adhesion, *p. 291*
Aging, *p. 104*
$AL(OH)_3$, *p. 291*
Amine catalysts, *p. 37, 122*
Analysis, *p. 42*
Analytical method, *p. 194*
Antioxidants, *p. 346*
Appliances, *p. 69*
Applications, glass foams, *p. 210*
Aromatic polyester polyols, *p. 431*
Automotive, *p. 49, 58*
Automotive seating, *p. 416*

Bimetallic bow, *p. 227*
Buoyant materials, *p. 150*

Catalysis, *p. 291*
Catalyzed phthalation, *p. 42*
Cell breakage, *p. 369*
Cell deformation, *p. 369*
Cell strut bending, *p. 369*
Chemistry, *p. 291*
Chromatography, *p. 129*
Closed cell foams, *p. 150*
Combustibility, *p. 279*
Comparison testing, *p. 279*
Compression models, *p. 438*
Concrete block/masonry wall, *p. 64*
Conduction, *p. 114*
Conductive Black, *p. 291*
Conductivity, *p. 291*
Continuous panel laminates, *p. 431*
Copper, *p. 291*
Crosslinked foams, *p. 150*
Cushioning, *p. 416*

DABCO, *p. 291*
Demold properties, *p. 30, 69*
Determination, *p. 274*
Diphenylmethane diisocyanate, *p. 416*
Discoloration, *p. 346*
Dispersion, *p. 291*
Dual hardness, *p. 49*

E-84 tests, *p. 431*
Elastomeric coatings, *p. 257*
EMI/RFI Shielding, *p. 291*
Emulsification, *p. 220*
Enclosed room fire test, *p. 279*
Energy attenuation, *p. 150*
Energy conservation, *p. 257*
Ethylene oxide, *p. 274*
Extinction coefficient, *p. 114*

Fire test, *p. 279*
Flame Retardance, *p. 291*
Flexibility, *p. 291*
Flexible polyurethane foams, *p. 37, 49, 122, 200, 416*
Flotation, *p. 150*
Fluorocarbons, *p. 138*
FM calorimeter tests, *p. 431*
Foam, *p. 291*
Foam cell structures, *p. 369*
Foam composites, *p. 227*
Foam degradation, *p. 351*
Foam molding, *p. 416*
Foaminess, *p. 220*
Functional Particulate, *p. 291*

Gas diffusion, *p. 104*
Glass foams, *p. 210*
Graphite, *p. 291*

Heat of reaction, *p. 351*
Heat susceptibility, *p. 138*
Heat transfer, *p. 64*
High performance liquid chromatography, *p. 129*
High resiliency, *p. 49, 58*
Hindered phenols, *p. 346*
HR foam, *p. 369, 410, 416*
Humid aged compression set, *p. 58*
Hydrophile-lipophile balance, *p. 220*
Hydrophobicity, *p. 291*
Hydroxyl content, *p. 42*
Hydroxyl number, *p. 274*
Hypersoft foams, *p. 200*

Imines, *p. 129*
Impact, *p. 291*
IMR, *p. 363*
Infrared, *p. 114*
Insulation, *p. 64, 114, 150, 210, 257*
Internal mold release, *p. 357, 363*
Iron Oxide, *p. 291*
Isocyanurate foam, *p. 129, 138, 431*
Isocyanurate yield, *p. 351*

Ketjen Black EC, *p. 291*
Kevex Analysis, *p. 291*
Kevlar, *p. 291*

Lamination, *p. 138*
Low density, *p. 58*

Maximum foam temperatures, *p. 351*
MDI, *p. 285*
Mechanical loading, *p. 369*
MICA, *p. 291*
Microcellular, *p. 144*
Mini-compartment corner test, *p. 279*
MOCA, *p. 291*
Model system, *p. 129*
Modeling, *p. 114*

NCO Depletion, *p. 291*
Near infrared, *p. 274*
Nitrile/PVC foams, *p. 150*
Nuclear magnetic resonance, *p. 194*

Permeability, *p. 104*
Piled foams, *p. 200*
Poly BD, *p. 291*
Polycarbanilide, *p. 64*
Polymer/resin foams, *p. 150*
Polymeric MDI, *p. 64, 138*
Polyesters, *p. 138*
Polyethylene, *p. 438*
Polyether polyols, *p. 194, 346*
Polyols, *p. 42, 215, 274*
Polystyrene, *p. 438*
Polyurethane, *p. 144, 363, 369*
Polyurethane foams, *p. 200, 285*
Polyurethane/urea resins, *p. 434*
Primary hydroxyl, *p. 194*
Process, *p. 144*
Product development, *p. 285*

Radiation, *p. 114*
Rapid analysis, *p. 42*
Reaction sequences, HR foam, *p. 410*
Reinforcement, *p. 144*

Rigid polyisocyanurate foam, *p. 279*
Rigid polyurethane foam, *p. 30, 64, 69, 104, 129, 200, 227, 279, 431*
RIM, *p. 144, 339, 357, 363, 434*
Roofing, *p. 138*
Roofs, *p. 257*
Rotomolding, *p. 335*
RRIM, *p. 291*
R-value, *p. 114*

Scaling, *p. 279*
Scanning electron microscopic study, *p. 369*
Scorch, *p. 346*
Self-releasing, *p. 357*
Shock absorption, *p. 150*
Silicone additives, *p. 363*
Silicone surfactants, *p. 220*
Silicone syntactic foams, *p. 423*
Slabstock production, *p. 200*
Smouldering, *p. 49*
Sprayed polyurethane foam, *p. 257*
Stress-strain behavior, *p. 438*
Structure, *p. 210*
Structure/property relationships, *p. 285*
Surfactant properties, *p. 220*
Surfactants role, in HR foam, *p. 410*
Syntactic foams, *p. 423*

Tg, *p. 291*
Thermal conductivity, *p. 114, 257*
Thermal resistance, *p. 257*
Thermal stability, low temp., *p. 69*
Tin catalysts, *p. 37*
Titanate coupling agents, *p. 291*
Titration, *p. 42*
Transmissivity, *p. 114*
Trichlorofluoromethane, *p. 200*

Urethane modified isocyanurate foam, *p. 129, 215*

Vibration control, *p. 49*
Viscosity, *p. 291*

Water, *p. 274*
Water-blown foam, *p. 58*
Wollastonite, *p. 291*

Zeolite, *p. 291*
Zinc borate, *p. 291*

AUTHOR INDEX
VOL. 20 / 1984

Allen, T. E., *p. 30*
Allen, W. M., *p. 69*
Alumbaugh, R. L., *p. 257*
